REPORT OF THE DEPUTY MINISTER.

The Right Honourable

Sir RICHARD J. CARTWRIGHT, G.C.M.G.,
Minister of Trade and Commerce,
Ottawa.

SIR,—From the figures herewith submitted in the form of the tenth annual Report (year ended June 30, 1902) it will be seen that the Dominion as a whole has again been blessed with great and increased prosperity.

[The aggregate trade has exceeded that of the previous year to the extent of a little over \$37,000,000, while the increase over the year 1895 has been, in round numbers, \$199,500,000; or placing the figures of the two years on the same basis by deducting from the published figures for the year 1895, the amount added as representing the estimated amount of exports short reported (no similar addition having been made to the figures for the year 1902) the increase shown exceeds \$202,790,000, or say over 91·7 per cent, or on the basis of imports for consumption and exports of home produce, merchandise only, 96·05 per cent.]

In connection with this subject it might be well to mention that while all countries publishing trade statistics can point to increases during the past six years, none can show such gratifying figures, as Canada in point of fact, to use words more expressive than elegant, 'leads the procession'; in other words, Canada's percentage of increase is the highest as will be seen by the following, and by the attached statement, vide page xviii, covering the figures for the same period of several of the countries with which Canada has more or less dealings:—

	Per cent.
Canada.....	96·05
Japan.....	89·06
Australia, Commonwealth of.....	62·21
United States.....	48·08
Netherlands.....	43·80
Italy.....	39·01
Germany.....	32·45
Belgium.....	32·08
Argentine Republic.....	30·91
United Kingdom.....	24·77
France.....	18·16
Spain.....	3·65
Cape Colony.....	2·62

[Further, Canada's trade during the year, per capita of population, figures at a little over \$77; that of the United States at between \$30 and \$31; Great Britain, \$102; France between \$53 and \$54; Germany about \$41.

The imports from Great Britain increased over the previous year to the extent of over six millions; from the United States over ten millions; Germany over four millions (which, however, is largely in the one item of sugar, a corresponding decrease occurring in the imports of that article from Belgium, which seems to indicate a change in route

rather than a change in the trade with those countries); France about one and one-half millions; from other countries there have been some small increases as well as small decreases.

As regards exports, the most important side of the subject, the increases have been notably to Great Britain, about twelve millions; British Africa about two and three-quarter millions; Australia over one-half million; Germany about the same, with various smaller amounts to various countries, and a falling off to the United States of a little over one million dollars.

The largest increase in exports (Canadian product) is under the heading of agricultural products, nearly twelve and one-half millions, followed by animals and their products, about three and three-fourth millions; the fisheries about the same; manufactures nearly two and one-half millions, and the forest two millions, while the produce of the mines has fallen off about five millions.

The information in Part II is still published for the purpose of indicating the demand in other countries for certain classes of goods, particularly such as can be furnished by Canada, and showing where Canadian push and pluck may find profitable openings, only to be secured by a strict adherence to business, promptitude and probity. There is yet unlimited room for safe and profitable expansion, as well as unlimited resources yet to be drawn upon.

The usual unrevised statement of the value of imports and exports since the close of the fiscal year covered by this report is appended, showing for five months continued advance, which with the proceeds of the heavy crops yet to be marketed, foretells equal increased prosperity for the year 1902-3.

Respectfully submitted,

W. G. PARMELEE,

Deputy Minister.

COINAGE, WEIGHTS AND MEASURES

To assist in arriving at a comprehensive understanding of the value of foreign currencies, weights and measures (as expressed in foreign trade returns, tariffs, &c.,) as compared with those of Canada, tables have been prepared as follows:—

As regards those of Canada, the law provides that the denominations of money in the currency of Canada shall be dollars, cents and mills, the cent being the one hundredth part of a dollar, and the mill one-tenth part of a cent.

That—The currency of Canada shall be such that the British sovereign (the pound sterling) of legal weight and fineness, shall be equal to four dollars eighty-six cents and two-thirds of a cent.

In like manner the law provides as respects weights, that the unit shall be the standard pound (avoirdupois) of 7,000 grains, one-sixteenth part of the standard pound shall be an ounce ($437\frac{1}{2}$ grains) one hundred pounds a cental, and two thousand pounds a ton, and that four hundred and eighty grains shall be an ounce troy, or 5,760 grains a pound troy.

As regards measures—that the unit or standard measure of capacity, as well for liquids as for dry measures, shall be the gallon containing ten standard pounds weight of distilled water weighed with the water and air at a temperature of sixty-two degrees Fahrenheit, with the barometer at thirty inches, that the quart shall be one-fourth part of the gallon, and the pint one-eighth part of the gallon, and that eight gallons shall be a bushel.

This gallon commonly known as the "Imperial Gallon," contains 277.274 cubic inches, or 353.036 cylindrical inches.

The standard measure of length is the yard, one-third part of which it is provided shall be a foot, and the twelfth part of such foot shall be an inch.

In many countries the Metric system of weights and measures has been adopted. A separate table of Canadian equivalents of these is given in order to avoid repetition, the word "Metric" being used in the general table in each case where the system is in vogue, as indicating a reference to that table.

The equivalent value of the monetary unit can only be given as respects those countries having a gold standard. Where silver is the standard, the value of the currency necessarily fluctuates correspondingly to the market value of silver bullion, and were any attempt made to quote the value of such currency it would, under present circumstances, be misleading, therefore, the weight in decimal parts of an ounce with the fineness of the coin is given instead, which will enable any one to approximate the value of the currency according to the current value of fine bar silver. As an example, say fine bar silver at 75 cents an ounce, the Bolivian dollar weighs .801 of an ounce, its fineness is .900, therefore $75 \times .801 = 60.075$ which $\times .900 = 54.0675$, or a small fraction over 54 cents, and the actual intrinsic value of the pure silver contained in the coin, to which should be added a reasonable allowance to cover the value of the alloy, the cost of the coinage, and in some instances exchange, the aggregate of which would be approximately the current value in Canadian currency of the dollar in question.

Unless carefully noted, the quotations as usually given of the current value per ounce of silver may be misconstrued and lead to misapprehensions, as it is sometimes quoted per ounce *fine*, and sometimes per ounce *standard*; thus for instance on a certain day the London quotation reads "fine silver per ounce standard 32 d.," while on the same day it is quoted in New York " $69\frac{1}{2}$ cents per ounce fine;" as 32 d. is equal to a fraction over $64\frac{1}{8}$ cents, there would appear a difference of about $4\frac{5}{8}$ cents per ounce between the two prices, the New York price appearing that much in excess of the other, were it not noticed that one is based upon *standard* fineness and the other upon absolute fineness, but by reducing the New York "fine" to London "standard" (of .925 fine, or 444 grains fine to the ounce) the actual difference between the two quotations is found to be only about $\frac{5}{8}$ of one cent per ounce, the London price being that much in excess of the New York.

SESSIONAL PAPER No. 10

To reduce the value of *standard* or sterling silver when expressed in pence to *fine* expressed in cents, multiply the pence and decimal parts thereof by 2·192.

To find the *standard* or sterling value expressed in pence and decimal parts thereof when *fine* is expressed in cents multiply the cents by 0·4562.

* Old weights and measures sometimes used. † The values in Chinese Imperial Customs Returns are always given in Haikwan taels, which are relatively in value equal to about 1.113 Shanghai taels. The tael is in reality not a standard of value (there is no such coin), but of weight, and when used in the sense of a value it only represents its weight in gold or silver, as the case may be, the real difficulty is to establish its exact equivalent in grains. Authorities differ greatly, as also does the practice in different sections of China. The Chinese are far from being exact, and the probability is that there exists a standard, and a further probability that it is equal to 10 Japanese monmes, or 579.72 grains, which figures have been used in computing the value as above. It will be observed, however, that these figures fall short about 3.61 grains from the weight usual (say 14 oz. per tael) in dealing with the weights other than those of gold and silver. ‡ For many years the value of the peso in Chili has been 91.2 cents, but by the Resumption Act of Feb. 11, 1895, the value of the peso is made equal to 18 pence = 36.5 cents. § Usually reckoned same as Chinese Picul of 133½ lbs. ¶ This is long measure. Therefore by cloth measure 1 sun = 1.4916 in., 1 shaku = 14.916 in. and 1 jo = 149.6 in. || Japan has adopted the Gold Standard, which came into effect Oct. 1st, 1897. Value of Gold Yen being 49¹/₁₀ cts.

CHINESE IMMIGRATION.

No. 78.—STATEMENT showing the TRANSACTIONS under the CHINESE IMMIGRATION ACTS to June 30, 1902.

The Original Act went into force as respects arrivals by vessels sailing from ports in North America on August 20, 1885, and as respects arrivals by other vessels on January 1, 1886, *vide* 48-49 Victoria, chapter 71.

The Act as it appears in the Revised Statutes, chapter 67 (1886), is slightly changed from the original. There have been since then two amendments thereto, *viz.*: as per 50-51 Victoria, chapter 35 (1887) and 55-56 Victoria, chapter 25 (1892).

These General Acts were repealed by the Act 63-64 Victoria, chapter 32, which came into force January 1, 1901.

The administration of the Act was by Order in Council of September 1, 1885, assigned to the Department of Customs and transferred to the Department of Trade and Commerce by Order in Council of March 13, 1893.

The annual revenue, expenditure, &c., has been as follows:—

During the same period 14,591 Chinese have taken out certificates of leave or registered for leave up to June 30, 1902, while a very large number have left the country without so registering, having no intention of returning, so that, for this latter reason, the exact number remaining in the country is uncertain.
